Fresh Graduate in Computer Science from Gunadarma University (GPA 3.83/4.00) and BNSP-Certified Associate Data Scientist. Experienced in developing high-accuracy Deep Learning models (LSTM, ResNet50V2) and building Unity-based applications. Proven technical leadership as a Lab Assistant and published researcher in AI-driven forecasting. Possesses a strong foundation in Python, SQL, and Machine Learning.

Education

Gunadarma University

Sep 2021 – Sep 2025

Bachelor of Computer Science (GPA 3.83/4.00)

- Published Research: Authored "Stock Price Prediction of PT Astra International Tbk Using LSTM," published in SINTA 3-ranked *Jurnal Ilmiah Ekonomi Bisnis* (2025). DOI: 10.35760/eb.2025.v30i1.11870
- Undergraduate Thesis: Developed a White Blood Cell classification system using Transfer Learning (ResNet50v2), optimizing accuracy across five distinct cell types.

Experience

Gunadarma University

Sep 2024 – Nov 2024

Assistant for the Mata Kuliah Praktikum Unggulan

- Led a team of lab assistants to manage practical sessions and resolve technical issues, ensuring an efficient workflow and timely student support.
- Assisted 5+ technical courses, including Big Data and AI, resolving student queries via Tawk.to with a high resolution rate.
- Guided students in Python, Data Science, and running tasks on NVIDIA DGX GPU systems.
- Maintained laboratory system uptime and provided real-time technical troubleshooting to ensure seamless operations.

Direktorat Jenderal Pendidikan Tinggi, Riset, dan Teknologi

Feb 2024 – Jul 2024

Metaverse Developer (Blockchain) Intern

- Developed a responsive character controller in Unity (C#) for Metaversitas, optimizing avatar movement and user interaction.
- Implemented a real-time chat system using C# and Rust, significantly improving message delivery speed and communication flow.

Gunadarma University

Sep 2023 – Jan 2024

Assistant for the Mata Kuliah Praktikum Unggulan

- Resolved student queries for AI, Big Data, and Robotics courses via Tawk.to for project completion support.
- Provided real-time guidance on Python, NumPy, Pandas, and Scikit-learn for data analysis and Machine Learning tasks.
- Assisted students in operating NVIDIA DGX systems to run GPU-accelerated computing and high-performance tasks.

Project

White Blood Cell Classification using ResNet50V2

Mar 2025 – Aug 2025

University of Gunadarma

- Developed a White Blood Cell classification model using ResNet50v2, achieving 98.72% accuracy on a test set of 1,018 images.
- Integrated the trained CNN model into a Streamlit web application for real-time automated image classification.
- Managed the full machine learning lifecycle, from data preprocessing and model optimization to final deployment.

Deep Learning Model for Stock Price Prediction of PT Astra International Tbk Using LSTM

Mar 2024 – Jul 2024

University of Gunadarma

- Published Researcher: Authored a study on stock price prediction for PT Astra International Tbk (ASII.JK) using Long Short-Term Memory (LSTM) networks, published in April 2025 (DOI: [10.35760/eb.2025.v30i1.11870](https://doi.org/10.35760/eb.2025.v30i1.11870)).
- Deep Learning Optimization: Developed an LSTM model achieving 98.55% accuracy with a 1.45% MAPE, demonstrating high precision in financial time-series forecasting.

Training and Certification

Quality Assurance Bootcamp (Batch 76)

April 2026 – May 2026

Sanbercode

- Software Testing Fundamentals: Mastered the full software testing life cycle (STLC), including the creation of comprehensive Test Plans and Test Cases.
- Defect Management: Experienced in identifying, documenting, and tracking UI/UX and functional inconsistencies via detailed Bug Reports.
- API Testing: Conducted automated and manual API endpoint validation using Postman to ensure data integrity and performance.
- Automation Testing: Acquired foundational skills in end-to-end (E2E) automation testing using Cypress framework.

Occupation of Associate Data Scientist

Sept 2025 – Sept 2028

Badan Nasional Sertifikasi Profesi (BNSP)

- National professional certification validating competency in the field of data science
- Demonstrates understanding of standardized data processing and analysis competencies
- Certified based on national competency standards (SKKNI)

Skills and Language

Technical Skills

- Programming & Frameworks: Python, SQL, C#, JavaScript, HTML, CSS, PHP (Basic).
- Database Management: SQL Server, MySQL
- Data Science & AI: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, CNN, LSTM, ResNet50V2, Matplotlib, Seaborn.
- Software QA: Postman, Cypress, Test Plan Document, Test Case Document, Bug Report Document.
- Version Control: Git, GitHub
- Other Tools: Tawk.to (Live Chat Support), Figma (Design), Microsoft Word, Microsoft PowerPoint.

Soft Skills

- Time Management, Team Work, Communication, Adaptability, Initiative, Technical Troubleshooting.

Languages

- Indonesian (Native).
- English (Able to read technical documentation, understand conversations, and basic speaking).
